Work Experience :

StorageApp (On-Going) — **Built with all my knowledge, time, and effort.**
It includes everything a large-scale app needs: full user/session management, soft/hard delete, real-time activity logs, one-tab login with Google/GitHub, and secure email OTP via Resend API.

- *Use Case*: Auto root directory on signup → unlimited nested folders like Google Drive. Admin can block or log out users anytime.
  Backend is built with strong validation, security, and scalability.
- **Tech Stack**: Node.js, Express.js, MongoDB (Mongoose), React.js, Redis, Multer, bcrypt, Google/GitHub OAuth, OTP, Resend API, MVC, RBAC

Ai-Doctor — AI-powered medical assistant using **Google Gemini API** to provide prompt-based health advice. Not a chat app — it stores user prompts with user data for future analysis.

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas, Gemini API, Desai UI, Auth via Email & OTP, Cookies

Lungi-house : *Lightweight retail web app for showcasing & selling lungis. Users can browse and order products easily, while admins can upload/manage listings via OTP-authenticated access.*

- *Use case: Built for simplicity — no user login or chat. Focused on clean UI, direct product access, and easy ordering.*
- **Tech Stack***: React.js, Node.js, Express.js, MongoDB Atlas, Desai UI/Tailwind CSS, Admin Email + OTP Auth*
